

**AMENDMENTS TO THE DRAWINGS:**

The attached drawing sheet includes changes to FIG. 1 by correcting the text in box **150**.

As originally filed, the text in box **150** read -- continue processing using a measured color --. In the replacement sheet being submitted herewith, the text in box **150** is being changed to read -- continue processing using the substituted value --. It is respectfully submitted that this correction is supported by the logic of FIG. 1, including, for example the text of box **146** which leads to box **150**. The text in box **146** reads -- substitute a reasonable value for the measured color signal --. Therefore, it is respectfully submitted, it is only logical that the box following **146** (i.e., **150**) should read continue processing using the substituted value. Additionally, the correction to box **150** is supported throughout the specification, and page 4, line 26 - page 6, line 21 in particular. For example, page 6, line 6-7 explain that a signal substitution **146** temporarily replaces the color measurement signal with a preferred reasonable value. Page 6, lines 9-10 explain that whatever value is selected to be the preferred color signal, that value is used for further processing **150**.

For at least the foregoing reasons, it is respectfully submitted that the correction to FIG. 1 does not represent new matter and should be entered.

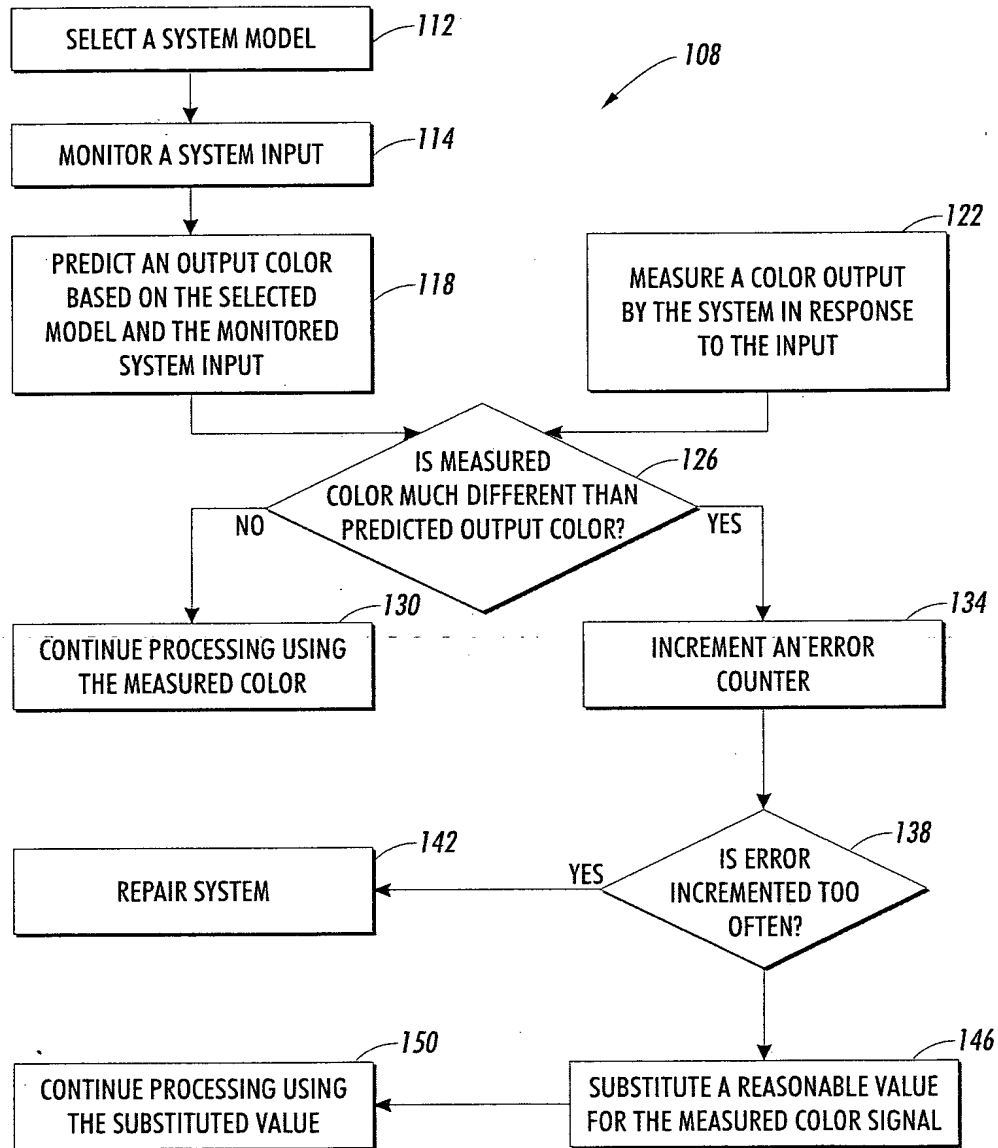

FIG. 1
